

Press release

RWE is taking part in Japan's largest annual energy trade exhibition

Japan, 3 August 2022

RWE, one of the world's leading companies for renewable energies, is taking part in Japan's largest annual energy trade exhibition. This underlines RWE's ambitions to further expand its renewables business to Japan and the wider Asia-Pacific region. During the "WIND EXPO 2022 [September]" event, taking place from 31st August through 2nd September at Makuhari Messe, RWE will be one of the leading exhibitors. RWE staff will share their expertise and experience in the development, construction and operation of large-scale offshore wind farms and give insights into new technologies, such as floating offshore wind and hydrogen.

RWE is a global leader in offshore wind, with more than 20-years experience in successfully developing, building and operating offshore wind projects. RWE see good growth opportunities for offshore wind in the APAC region having established offices in Japan, Taiwan, South Korea and India. Particularly, offshore wind has been attracting attention in Japan towards an ambitious target of becoming carbon neutral by 2050. In 2019, RWE Renewables opened its Tokyo office and now having a local presence of over 30 offshore wind professionals, RWE aims to leverage its global capabilities and expertise to develop, build and operate large scale offshore wind farms in Japan – together with its Japanese partners.

RWE has ambitious plans for further growth in the field of renewable energies

RWE is determined to contribute its expertise gained from the realisation and operation of 18 offshore wind farms in five European countries to forge ahead with offshore wind in Japan. By 2030, RWE intends to grow its global offshore wind capacity from currently 3 GW to 8 GW (capacity represents RWE's share only). Currently, RWE is constructing the 342 MW Kaskasi project off the German island Heligoland and its 1.4 GW Sofia project in the UK, one of the largest offshore wind farms in the world. More than 10 GW of secured offshore capacity are also under development. Furthermore, RWE is well on track to become a leader in floating wind and to have 1 GW either in operation or under construction by 2030. To gain experience early, RWE is participating in multiple floating demonstration projects in Norway, Spain and the US, each based on different technical concepts. The most advanced project is the TetraSpar Demonstrator project, which was commissioned off the Norwegian coast in 2021.

RWE is leading the way to a green energy world. With an extensive investment and growth strategy, the company will expand its powerful, green generation capacity to 50 GW internationally by 2030. RWE is investing €50 billion gross for this purpose in this decade. The portfolio is based on offshore and onshore wind, solar, hydrogen, batteries, biomass and gas.

RWE

WIND EXPO 2022 [September] Overview

Event title: WIND EXPO 2022 [September] – 2nd International Wind Energy Expo
Dates: Wednesday, August 31 – Friday, September 02, 2022 10:00am-17:00pm
Venue: Makuhari Messe, 2-1 Nakase Mihama-ku, Chiba City, Chiba Pref.
Organizer: RX Japan
How to visit: Apply for invitation ticket on the web (free)
Details: <https://www.wsew.jp/hub/en-gb/about/wd.html>
RWE booth: Makuhari Messe, Hall 5, Booth number E11-1

Speeches by RWE

Special Session

Title: From Europe to APAC, RWE's offshore wind development approach
Speaker: Jens Orfelt, Regional President, Asia-Pacific (Offshore Wind Development)
RWE Renewables
Date: Thursday, September 1, 2022, 30 minutes during 10:00 - 11:10 am (WD-S1)

Offshore Wind Power Seminar

Title: FOWT – From demonstrator to utility-scale projects
Speaker: Yoshitaka Mizushima, Engineering Manager, Offshore Wind
RWE Renewables Japan
Date: Wednesday, August 31, 2022 16:00-16:30
Venue: To be informed

For more information about “WIND EXPO 2022 [September] - 2nd International Wind Energy Expo”, go to <https://www.wsew.jp/hub/en-gb/about/wd.html>

To ensure strict compliance with all requirements in relation to the coronavirus the participation of RWE in trade fairs and conference follows an extensive review and internal approval process.

RWE

RWE is leading the way to a green energy world. With an extensive investment and growth strategy, the company will expand its powerful, green generation capacity to 50 gigawatts internationally by 2030. RWE is investing €50 billion gross for this purpose in this decade. The portfolio is based on offshore and onshore wind, solar, hydrogen, batteries, biomass and gas.

RWE Supply & Trading provides tailored energy solutions for large customers. RWE has locations in the attractive markets of Europe, North America and the Asia-Pacific region. The company is responsibly phasing out nuclear energy and coal. Government-mandated phaseout roadmaps have been defined for both of these energy sources. RWE employs around 19,000 people worldwide and has a clear target: to get to net zero by 2040. On its way there, the company has set itself ambitious targets for all activities that cause greenhouse gas emissions. The Science Based Targets initiative has confirmed that these emission reduction targets are in line with the Paris Agreement. Very much in the spirit of the company's purpose: Our energy for a sustainable life.
